

# PROYECTO My Timer

Extraído de *Pico Bricks IDE Book* CC-BY-SA <https://picobricks.com/pages/idebook> ver [créditos](#)

El clásico cuenta atrás pero con la peculiaridad que es fácil de programar con el potenciómetro, hasta las horas !

The screenshot displays the PicoBricks IDE interface. The top menu bar includes 'File', 'PicoProject', 'Run', 'Stop', 'Bluetooth', 'Doc', '</> Py', 'Block', and 'Simulator'. The toolbar contains icons for settings, zoom, and a trash can. The workspace shows a block-based program with a 'forever' loop containing 'if' statements for 'clue' values 0, 1, 2, and 3, each triggering a different action like 'hour', 'minute', 'second', or 'clock'. A 'Read Button' block is also present. To the right of the workspace is a sidebar with a list of projects: 'Magic Lamb', 'Maze Solver Robot', 'My Timer' (highlighted with a red border), 'Night And Day', 'Piggy Bank', and 'Smart Greenhouse'. Each project has a brief description and a 'More Detail' button. At the bottom right, there is a 'Report' button and a 'OneDrive - Gobierno de Aragón' watermark.
