

# PROYECTO My Timer

Extraído de *Pico Bricks IDE Book* CC-BY-SA <https://picobricks.com/pages/idebook> ver [créditos](#)

El clásico cuenta atrás pero con la peculiaridad que es fácil de programar con el potenciómetro, hasta las horas !

The screenshot shows the Pico Bricks IDE interface. The left pane displays a block-based program for a timer. It includes variables for 'hour', 'minute', 'second', and 'clue'. The program logic involves setting these variables to 0 and using a 'forever' loop to update them based on the 'clue' value. The right pane shows a list of projects, with 'My Timer' highlighted in a red box. The 'My Timer' project description reads: 'Tick-Tock! Countdown begins!'.
