

Solo placa: Música

Tan fácil como elegir la música y arrastrar el código:

The screenshot shows the micro:bit Python editor interface. On the left, the 'Reference' panel is open to the 'Sound' section, which includes a list of built-in tunes. A red circle '1' is next to the 'Reference' tab, a red circle '2' is next to the 'Sound' section, and a red circle '3' is next to the 'PYTHON' tune in the list. A red arrow points from the 'PYTHON' tune to a code block in the editor. The code block contains the following code:

```
1 import music
2
3
4 music.play(music.PYTHON)
```

The code block is highlighted with a red circle '4'. A red circle '5' is next to the 'music.PYTHON' argument in the code block. The editor title is 'Untitled project'.

Si te sabe a poco aquí tienes más
